

Consciousness Arising: Introduction and Invitation

Inspiring humanity with a positive vision of our future

Albert Einstein famously said that we cannot solve our problems from the same level of consciousness that created them. It is clear today that, in order to address our global crises, we need to meet them from a higher consciousness, both of the causes behind them, and of our own deepest true nature, from which we can draw the greatest power to transform them, with strength and wisdom, courage and joy.

Consciousness Arising is an emerging movement designed to help us access that higher consciousness, and to provide an evolving platform for collaboration to bring to birth a new future on Earth – of love, care, unity-in-diversity, and regeneration of our beautiful planet. We seek to revitalize and heighten, beyond our present imaginings, our connection with each other and the spirit of the sacred, the very Source of Creation that pervades us and the entire universe, bringing us to the realization of our highest potentials.

At the basis of this lies a vision, long held by indigenous peoples, masters and mystics, and now also quantum physics, that, in the face of our extreme global crises, is ready to be taken to a whole new level: a vision that honors the interconnectedness of all Being – humans, nature and Cosmos – in one unified field of consciousness that animates and informs all creation. The tenets of this vision and the Consciousness Arising movement are:

- 1) There is a Cosmic Intelligence underlying this manifest world.

2) We can tune into it, because each of us holds a node of it in our hearts, like a fractal of a hologram, which means that together we have the power to create a new world. Our own power, individually, is far greater, in this holographic sense, than we know, as it feeds into our collective power, which multiplies it exponentially, aligned with the deeper evolutionary potentials at the Source of Creation.

3) When we gather together in deep reflection, openness and honesty, a resonance is created which gives birth to revelation – insights, vision and action – greater than the sum of its parts. We tap into an evolutionary spiral, a co-creative synergy with each other and that very Source of Creation at our core, giving rise to the next level of our emergent future.

Open Space Technology, with which we begin this project, taps into that open space of potential from which all creation arises. Accessed through many diverse, unique vessels and expressed in many diverse, unique ways, the "wisdom in the room" that emerges is the wisdom of creation itself, the unified field of consciousness. The self-organizing process that takes place is the weaving together of these diverse expressions into a vision for the future that works for us all, because it springs from and expresses the Whole – the unified field of nature, humanity and Cosmos.

At the same time, we need to understand the present circumstances in this world, in order to transform them into a true expression of this Wholeness. Right now, division and fragmentation, vast inequalities, injustice and power abuses reign, resulting in the decimation of human rights and freedoms, an alarming rise of global techno-authoritarian rule, and the ravaging of our planet for the profits of a few. We need to understand the forms this deep divisiveness in consciousness is taking now (accelerated in the last two years), in order not to be unconsciously pulled along with them, but rather raise our own consciousness to align with the consciousness of our true Wholeness and the systems that would reflect it.

And just a humble disclaimer here, for those who think our project sounds incredibly ambitious or presumptuous – it's not really *us* raising our consciousness, but consciousness raising *us*, with a lot more help on offer than we are presently able to see! Acknowledging this, and opening to the unseen forces supporting us, paradoxically both humbles us, and allows us to tap into the

highest possible power – the infinite power that lies in the very Source of Creation. By becoming vessels for its flow, we become its co-creators.

The consciousness that is arising now, with which we seek to align in this movement, is a tide that can lift all boats, combining both inner and outer transformation, consciousness and systems change, personal and global healing. By looking deeply into all these levels, and bringing forth our deepest reflections and vision, we can weave together the beautiful world so many of us yearn for – and already hold in our hearts.

Please come and join us, bringing your own skills and inspiration, as we bring to birth this new world!

With love,

Jean, Kavita, Kate and Amber

Complementary Information

- Participants must commit to the one day meetings — two 3-hour sessions with a one hour break in between — to be held through Zoom on May 7th, from 7:00 to 14:00 Pacific time, 10:00 to 17:00 Eastern Time, 15:00 to 22:00 in the UK and 16:00 to 23:00 in continental Europe.
- If you are unsure about the corresponding starting and ending moments for your time zone, you can find them through <https://bit.ly/36Yrh20> and <https://bit.ly/394VYU9>.
- The Zoom link will be emailed to you two days before the event. To ensure our emails do not end up in your spam box, please whitelist registration@consciousnessarising.org and info@consciousnessarising.org through which you can correspond with us.
- You need to be sufficiently fluent in English to participate in this work as no translation will be provided. We hope workshops in other languages will emerge from this first experiment in co-creating our future.

- Once your participation has been confirmed, you will be invited to review additional written and video material that will be available at www.consciousnessarising.org

- If for some reason, you realize that you will not be able attend our event on May 7, please let us know as soon as possible.

Note: We recommend you also review this complementary [document](#) explaining the overall vision for this project.
